

Your Key to Patient Relationship Management

Solutionreach is a cloud-based software platform that revolutionizes patient relationships and optimizes the patient experience. By delivering the **right message**, to the **right patient**, at the **right time**, you make every patient the *only* patient.

Retain Your Patient Base

There are a few key factors for keeping patients loyal and active. Solutionreach addresses every aspect of patient retention with features like automated appointment reminders, patient surveys, and many more. Our automated engagement tools ensure that you keep satisfied, engaged, and healthy patients.

Acquire New Patients

Solutionreach makes it simple to generate new patients, increase referrals, and market your practice. We improve your online reputation with automated patient reviews and referrals, integrated social media, local search assistance, patient mapping, and much more.

Reactivate Lost Patients

Solutionreach finds and reactivates lost patients by reaching out when they are overdue for their continuing care dates. The Solutionreach Recall Module is an effective, intuitive system that monitors your schedule and sends automated messages with built-in scheduling tools before and after patients are due for their next appointment.

Educate Your Patients

Between visits, patients can become disengaged from their healthcare because they don't have access to valuable, reliable information. Our electronic newsletter feature fills the gaps in the care delivery stream. Our tools have been engineered to make it easy to educate your patients with targeted information to help maintain an engaged doctor-patient relationship.

Revolutionary Support

Every Solutionreach customer is provided unlimited, live training and support from dedicated success representatives. We don't just give you tools for success; we make sure they work for you!
